

Woody Valley buckles

Following on from Woody Valley's safety notice regarding buckles stamped 07/13 and 08/13 (Safety matters, September 2014), they have now released an update to reduce the risk of any unwanted openings. Get in touch with your Woody Valley dealer for more information. The retro-fit is a simple silver clip that hugs the buckle, as seen in the photo (below), which is easily fitted either by yourself or your dealer. If you have a Woody Valley harness with the red buckles outside the affected batch and you would like to fit the clips, your dealer will be happy to provide them.
